

ILDA Stems Search

1. Normal Search

Type any term to search for among the *Name* and *Translation* field of the stems to get all the results that match the search term.

Eg: Searching the term *age* results search that matches *age* in both *Name* and *Translation* fields.

age  

[Using Advanced Search ?](#) [x Clear Search and filters](#)

Name ⇅	Translation ⇅	Part of Speech ⇅	Status	Dictionary
Hootze	Sagehen	N/A	Approved	  
Koomeageena	Clouding up	N/A	Approved	  

2. Filters

The option to filter the search results is only available for Admin and Maintainers. The filter dropdown is next to the search button. It allows filtering of search results based on Approved/Unapproved status and whether the stem is or is not in the dictionary.

Filtering can be used with normal search or advanced search.

Search a

Status

- All
- Unapproved
- Approved

In Dictionary

- All
- In Dictionary
- Not In Dictionary

3. Advanced Search

- Use ':' to specify the search field.
- Use '&', '|' operator to combine search parameters.
- Search fields: *name*, *translation*, *partofspeech*
- *partofspeech*, *partsofspeech*, *pos* are all accepted search field for searching parts of speech
- Search fields and terms are case-insensitive

Example 1:
